PROFESSIONAL EXPERIENCE

Switchmode Power Supplies Pty Ltd

Electronics Engineer Trainee

Hornsby, NSW

Jun. 2026 - Present

- Working in the maintenance, testing and repair of low to high voltage power supplies and equipment
- Development of custom equipment for power supply glitch detection

UNSW Electrical Engineering and Telecommunications Society

President

Kensington, NSW

2023 - 2026

- Managed a team of 50+ students coordinating with faculty, industry and alumni
- Organised and led professional meetings with the team, sponsors and staff
- Delivered 100+ events in 2025, achieving 2.5 million views and 4000 hours of course support

UNSW Casual Academic

Senior Lab Demonstrator

Kensington, NSW

Dec. 2023 - Present

- Marked, tutored and assisted students in practical labs and workshops including lab exams and content delivery
- Experience in ELEC1111, ELEC2133, ELEC3106, ELEC3117, ELEC4123, DESN1000, DESN2000

UNSW Deans Engineering Unit

Student Ambassador

Kensington, NSW

Sep. 2023 - Present

- Assisted and advised future students on course selection, event registration, guest guidance, seating arrangements, feedback collection, photo editing

EDUCATION

University of New South Wales (UNSW)

Bachelor of Electrical Engineering (Honours) / Master of Electrical Engineering (BE/ME)

Kensington, NSW

2023 - 2027

PROJECTS

UNSW Skylabs

Avionics & Payload Team Lead

Kensington, NSW

Aug. 2025 - Present

- Designed, built and tested live telemetry systems using an ESP32-based PCB including IMU, Differential Pressure, Atmospheric, Temperature and Humidity sensors, GNSS GPS modules, LoRa, Strain Gauges and interfacing with ESCs
- Travelled to Wichita, Kansas as part of the AIAA DBF competition representing UNSW

rUNSWift

Behaviours/Hardware Team Member

Kensington, NSW

Dec. 2024 - Present

- Developed, wrote and tested code for NAO V5/6 and Booster K1 humanoid robots in Python and C++ using ROS2
- Prepared and led the Sydney team during the 2025 RoboCup International Competition (El Salvador)

LoRa Talkie

Personal Project

- LoRa RF walkie talkie using Morse code and custom GUI written in C++

Dash

Personal Project

- ESP32-based safe driving detector including IMU, capacitive touch, amplifier & speaker, OLED screen, BMS and charging system, micro-controller programming circuit and custom housing

Metroboard

Personal Project

- Live Sydney rail network indicator featuring 290+ LEDs, Wi-Fi connectivity, a 30x30cm PCB, using TfNSW GTFS real time data

MISC.

- **Technical Skills:** C, C++, Python, Assembly, LTSpice, LaTeX, Adobe Premiere Pro & InDesign, Canva, KiCAD, MATLAB, Simulink
- **Certificates and Experiences:** Australian Defence Force Future Innovators Award (2020), City of Ryde Young Volunteer of the Year Nominee (2022), AMEB Grade 8 Piano/Grade 6 Clarinet, Duke of Edinburgh Bronze, Working with Children's Check
- **Volunteering:** Biomedical Engineering Student Society (BESS), UNSW Real Estate Society, UNSW Mechanical Keyboard Society
